PROFESSIONAL EXPERIENCE

Lead Front End Engineer/Consultant

Xebia | Oct 2019 - Present

- Operated within a remote Agile environment as the sole external team member on the IDFC First Bank client-side team, which was led by another prominent company. Despite this dynamic, I quickly rose to prominence and became a core contributor.
- Led the team of 6 front-end developers, serving as the senior-most member to provide mentorship and code review.
- Acknowledged with an outstanding contribution award from the client.
- Coordinated with BA, TL, and client stakeholders for requirement analysis, estimations, feature planning, prioritization, and sprint demos/showcases.
- Delivered 10 lead generation features and 5 loan management features for React-based mobile and web applications, resulting in 20% increase in leads for the bank.
- Consistently relied upon to support sub-squads during critical phases, ensuring sprint stabilization and success.
- Drove the development of reusable components within team, significantly reducing boilerplate code and streamlining screen/page development time by 60%, thus enhancing overall efficiency.

Senior Front End WordPress Engineer

WisdmLabs | Jan 2015 - Oct 2019

- Developed 11+ WordPress custom themes, tailored from designs, primarily for e-commerce and e-learning domain while managing the full project lifecycle, including client interactions, requirement gathering, estimation, testing, debugging, maintenance, and coding activities.
- Contributed to frontend development of internal products, including 2 plugins, 1 theme, and 1 marketplace.
- Optimized the company's official site to drastically improve load times.
- Led the front-end team, providing mentorship and guidance to ensure high-quality deliveries.
